Five-Year Service Quality Improvement Plan

Golden Belt Telephone Association, Inc.

Narrative Description

The Company has plans for a number of specific improvement projects for 2015, including new line extensions and equipment installations, cable and other equipment additions and upgrades, and maintenance of existing facilities. These projects will significantly improve voice service coverage, broadband access and speeds, and the overall capacity of the Company's network. From 2016 to 2019, the Company's service quality improvement plans are much less definite due to the uncertainties stemming from the financial impact of USF/ICC reforms. Nevertheless, the Company has evaluated its network carefully and intends to continue making improvements assuming high-cost support mechanisms continue at no less than current levels in the years 2014 and beyond.

The Company has recently completed connecting its subscribers to fiber facilities at a cost of \$16,356,431. Accordingly, it anticipates minimal additional capital expenditures to further extend these facilities within its service territory over the next five years. Nevertheless, the Company will continue to replace, maintain and upgrade fiber facilities, switching and transmission equipment as needed to give our customers the best service possible. The Company anticipates using the majority of its federal high cost support over the next five years to repay the providers of debt and equity capital that provided the funding to enable the deployment of a state-of-the-art network in a sparsely-populated, high cost area.

As set out in **Attachment 1**, the Company estimates that its total capital expenditures in 2015 within the State of Kansas will be approximately \$2,618,792. The Company also estimates that it will incur approximately \$7,998,662 in operating expenses providing service during 2015. In addition, the Company estimates that it will repay debt totaling \$1,448,053, which debt was incurred to fund projects to improve voice service coverage, broadband access and speeds, and the overall capacity of the Company's network. The Company estimates that its service quality improvements planned for 2015 will serve a population of approximately 6,773 and covers an area of approximately 3,230 square miles.

Attachment 1 also sets out the projected capital expenditures, operating expenses, debt repayment, and population and area served for the years 2016-2019.

The aggregate dollar estimates stated above, as well as the projections set out in **Attachment 1**, are the Company's current estimates based on budget forecasts. Projections of this sort are by nature uncertain and invariably change by the time projects are completed. The Company also notes that, from year-to-year, the number and size of network improvement projects change, particularly as the Company approaches completion of network expansion and upgrades throughout its service territory. Therefore, the total capital expenditures and operating expenses will vary year-to-year regardless of the amount of USF disbursement received in each year.
